

Coltivare Farming Solutions

"Growing More with Less"

Since 2011, Coltivare has helped Midwest growers boost yields while shrinking their environmental footprint. Our data-driven tools, regenerative practices, and farmer-first support network turn sustainable ambition into measurable profit.

Our Mission

Empower every farmer—large or small—with technology and know-how that makes sustainability the most profitable choice.

Our Vision

A Midwest where healthy soil, clean water, and strong rural economies grow together.

Flagship Products

- HarvestSync™ IoT Soil Monitors Real-time moisture, NPK, and temperature data straight to your phone.
- CarbonView™ Dashboard Track carbon credits and ROI on regenerative practices.
- SeedSelect™ Analytics AI-driven hybrid/variety recommendations for your exact micro-climate.

Services

- Regenerative Transition Planning
- Grid Soil Sampling & Zone Mapping
- On-Farm Carbon Credit Verification
- 24/7 Agronomist Hotline

Why Farmers Choose Coltivare

- Average 7 % yield increase in year one
- Up to \$52/acre in new carbon-credit revenue
- 24-hour parts & data support guarantee
